dolce dormire

The mattress Botticelli
Double Memory is the result of skillful and better mixing of different materials and it is obtained after careful laboratory tests.

[24 cm - 9²⁹/₆₄in]
Height of the finished mattress with a slab of 20 cm, 7⁷/₈in

MADE IN ITALY

- Optional: Biocotton covering
- Lift kg: 0 - 110
- Lift lb: 0 - 242

THE MATTRESS

Botticelli Double Memory is the result of skillful and better mixing of different materials and it is obtained after careful laboratory tests.

An advanced technology research has permitted to create a special foam like the viscoelastic Waterlily.

Thanks to its elasticity, high breathability and cells structure, the new viscoelastic Waterlily lets :

- Model itself through the thermal action of the body;
- improve breathability favoring the removal of moisture produced by the body;
- absorb and distribute uniformly the body weight ;
- minimize the points of pressure and obtain a high level of comfort of use;

The viscoelastic Waterlily offers characteristics of residual deformation and resistance to tearing equivalent to the top materials present on the market. It presents also a viscoelastic effect and a remarkably higher breathability than the competition.

The mattress is made by an inalterable high good quality material in order to assure the breathability and a correct support.

The antiacarus covering with elastane has a quilting of particular visual impact.

This article lets sleep on a high quality Memory foam in both sides. It models itself thermally to the shapes of the person so as each part of the body will have the feeling of being on a cloud.
