 [23 cm, 9 1/16 in]

MADE IN ITALY

- Pocketsprings, 7 areas
- Lift kg: 0 - 110
- Lift lb: 0 - 242

THE MATTRESS

The mattress CIMABUE with 7 differentiated areas independent pocket springs is the evolution of the classic springmattress Bonnel.

The greater numbers of springs than traditional mattresses allows to obtain a higher sensitivity in the adaptation of the spinal column, ensuring a more ergonomic and comfortable rest.

Each single spring is coated independently with tissue in order to avoid getting stuck and to differentiate every change of weight.

The structure is composed of springs at different lift to respect the different pressure loads of the body. In this way the mattress adapts ergonomically offering a correct support.

The high quality of the springs ensures a long service life of the mattress.

The high density and CFC free Waterlily Box is expanded with a water system with open cells to guarantee the breathability and the inalterability of the mattress.

The wadding coupled to antiacarus and hypoallergenic fabrics make this product hygienically perfect and air-conditioned.

The practical handles allow an easy positioning of the mattress.

The breathability of the mattress is enhanced by 4 aerators.

The pocket springs mattresses are among the best available in the market of spring mattresses. They are long-lasting and very comfortable.
