dolce dormire

The mattress PICASSO with a biconical steel springs bonnel is manufactured with a particular system of boxes in Waterlily.

THE MATTRESS

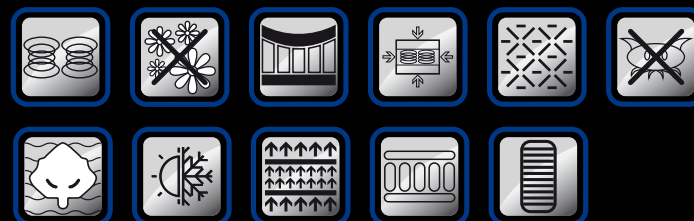

Picasso with a biconical steel springs bonnel is manufactured with a particular system of boxes in Waterlily. The internal reinforced strap allows to distribute the weight of the body in order to lighten the pressure of the body in the critical points (shoulder, pelvis). The materials are accurately selected and tested and they permit to reach very high quality standards. The right stiffness makes it particularly comfortable giving to those who rest a pleasant feeling.

 [22 cm, 8²/₃in]

MADE IN ITALY
